

2022-23, Cipla posted total revenues of ₹22,753 crore against ₹21,763 crore the previous year. Present in 85 markets, with 47 manufacturing facilities worldwide, Cipla has anti-retroviral, and anti-infective drugs, along with therapeutic segments like urology, cardiology, etc.

During 2022-23, Cipla got approximately 43 per cent of its revenues (or ₹9,869 crore) from India, 26 per cent (₹5,909 crore) from the US, 10 per cent from South Africa and 20 per cent from the rest of the world.

Umang Vohra, Cipla's CEO, said at a July 26 investor call that the US business accounted for 29 per cent of Cipla's overall revenues in the first quarter of 2023-24. "The trajectory that is normal for us is somewhere around the \$210 to 215 million quarterly range. I don't think we would guide to something higher than that," Vohra said.

WHY CIPLA IS RIPE FOR PE

Mergers and acquisitions have been the favourite flavour in the Indian pharma industry, especially after the Covid-19 pandemic. During the second quarter of CY2023, at least seven PE deals, valued at \$3.2 billion, took place in the Indian pharma space, according to data analytics firm GlobalData's Deals Database.

Among these were an institutional buyout of \$2 billion involving Manipal Health Enterprises, Blackstone acquiring a controlling stake in Care Hospitals from TPG for \$800 million in May 2023, and Bain's \$304 million for Porus Laboratories in June 2023.

PE has been transforming businesses. Check out Mumbai-based JB Chemicals & Pharmaceuticals, which specialises in branded formulations in cardiac, gastrointesti-
