

SMOG ALERT

With emissions of over 3,300 million tonnes of CO₂ equivalent, India was the third-highest polluting nation in 2021, just behind China and the US, says the CRISIL Sustainability Yearbook, 2022. India has been taking steps towards a greener ecosystem and it is reflected in its score improving on the NITI Aayog SDG India Index & Dashboard to 66 in FY21 from 60 in FY20. A status check

THE RACE AGAINST TIME

The journey to net-zero emissions for most countries has already begun

	Net-zero target (By year)	Present carbon emissions (MtCO ₂ e)
China	2060	11,710
US	2050	5,794
India	2070	3,347
Russia	2060	1,992
Brazil	2050	1,379
Japan	2050	1,155
Germany	2045	777
Canada	2050	763
UK	2050	441
Pakistan	2050	438
UAE	2050	263
Ukraine	2060	262
New Zealand	2050	71
Singapore	2050	67

MtCO₂e: Million tonnes of CO₂ equivalent
