

the EHS in-charge of co-ordination with the waste producers. To spread awareness, EHS In-charge, Department Heads/Operation Supervisors conduct toolbox talk on waste management procedures and practices from time-to-time at Nucleus Office Parks.

Mitigating Environmental Impact

At every step of NOP's business cycle, environmental performance is most critical for the company which is managed by a slew of initiatives that includes compliance of regulatory requirements and Environmental Management System (EMS) certification. Resource efficiency improvement and reduction of Greenhouse Gas (GHG) emissions, freshwater intake and waste generation ensures safety and hygiene for all occupants..

NOP stands committed on meeting environmental goals and targets across individual assets and at organizational level with compliance to all regulatory requirements pertaining to Environmental Management Regulations. Compliance status reports are also submitted to management on a quarterly basis.

Community Compassion

Committed to the socio-economic well-being of underserved communities in the areas where NOP operates, it's CSR Policy and Standard Operating Procedure framework shows the path to effectively plan, execute, monitor, and report relevant activities for each financial year. The three key areas identified by the CSR Policy for maximizing positive impact on communities are Education, Healthcare and Environment.

One such endeavour is giving back to society by developing community spaces through design and engineering with best in class streetscapes and urban infrastructure. 'Equal street for all' was a project where NOP engaged an international design firm and completely redesigned the under fly-over space, creating 1,900 sq. m. of new usable social spaces. One Green Mile was an ambitious initiative undertaken by NOP at Lower Parel, a prominent locality featuring several historical landmarks, some of the finest retail malls, luxury apartments, and prime commercial spaces defining the skyline of Central Mumbai. NOP transformed a stretch of 1.8kms (making it over a mile), increasing the green cover by planting more than 100+ trees, besides creating social spaces under the flyover and hence the project was named One Green Mile. The project was inaugurated on 23rd January 2022 for public use and will be main-

tained and managed by Nucleus Office Parks for the next 3 years.

Other community activities of NOP include blood donation camps, donations to charitable Trusts for various CSR activities aimed at improving the community health and education among others such as old age homes and orphanages.
