

Key Discussions and Business Meetings at WEF

During the Discussion 'The Reuse Imperative' organized by World Economic Forum, Maharashtra's, Environment Minister Shri Aaditya Thackeray shared his views on changing consumer trends and policy impacts with global business leaders and policy makers.

A forum initiative briefing was also organized with GPAP, wherein Ms. Kristin Hughes, Executive Director of GPAP elaborated on the policy changes and business partnerships on a global scale for stringent plastic action measures.

During WEF, the Maharashtra delegation had a series of meetings and productive discussions with industry pioneers like Suntory Group, UPL Ltd., Lulu Group, Jubilant, Tetrapak, Planet Labs, Maersk, Arcelor Mittal, JLL, Byju's, Amara Raja, CPP Investments to discuss the investment opportunities and future growth plans in key sectors and encourage their vision of making Maharashtra – A Trillion Dollar Economy.

Maharashtra being a major contributor to India's Aerospace and Defense Sector, had a discussion with Voyager Space Holdings Inc., the first space focused holding company in the world about the opportunities in the Aerospace & Defense sector in state.

In order to boost up the healthcare sector in the state, the Maharashtra delegation had discussions with healthcare leader Roche about personalized medicines, medicine focused R&D, medical devices & diagnostic opportunities in Maharashtra. They also discussed about the Integrated disease management (one instrument for multiple treatments), AI backed Telemedicine and pre-emptive medicine.

WEF was a significant event to identify the synergies that have enabled various economies to realize the 'trillion-dollar vision' and assess the positioning of Maharashtra. These platforms also give a chance to discuss the specific factors which could be the drivers and the obstacles for growth on its path to a trillion-dollar economy.

MAHARASHTRA INDUSTRIAL DEVELOPMENT CORPORATION

The Maharashtra Industrial Development Corporation (MIDC) was established by an Act of the state legislature in 1962 with the mission of achieving balanced industrial development in Maharashtra.

This special planning body operates through a broad network of local offices and has created 289 industrial parks around the state on 2.25 lakh acres of land. MIDC has spent the last few years focusing on developing commercial partnerships with nearly all of the world's main trading partners. The most important role of MIDC is to ensure the availability of encumbrance-free land to entrepreneurs and manufacturers – helping Maharashtra in taking the leap to become India's most industrialised state, with the highest contribution to the country's GDP. The key objectives of the MIDC are to set up industrial areas for planned and systematic industrial development, to function as a special planning authority in the development of industrial areas and with a corporate philosophy of prosperity for all through industrialization. Key Activities of MIDC

includes Special Planning Authority, strong network of local authorities, link between Govt. and Industry, acquisition and disposal of land, providing support infrastructure, one-stop for Investors relations.

MIDC offers developed plots in various industrial areas. After acquiring land, MIDC creates high-quality infrastructure including roads, water supply systems street lighting, and in some cases, common facilities buildings which may be offered to commercial establishments to serve the needs of the industrial units. These areas are provided for a lease period of 95 years. In many industrial areas, MIDC has specially earmarked commercial and residential zones in addition to the main industrial zone. Some industrial areas also have a common effluent treatment plant (CETP). Apart from developed plots, MIDC also offers

built-up spaces. The built-up spaces are tailor-made to meet the needs of specific industry sectors. Such built-up spaces are available in specific industrial locations.

The third category of properties offered by MIDC is the industrial sheds. These are normally targeted for the small-scale sector and hence are of small sizes of about 1000 to 2000 sq. ft. These sheds are available in select industrial locations. MIDC also supports skilling in the state by supporting Skill Development centers with the help of CEPET at Aurangabad and Nagpur. It also runs one of the largest water supply schemes in Asia. It implements Industrial policy of the State as nodal agency. MIDC is the nodal agency for the Delhi Mumbai Industrial Corridor nodes in Maharashtra.
