

GLOBAL DEPLOYMENT

198

The number of operators who have already deployed 5G networks globally, according to CLSA

72

countries across 1,947 cities already have 5G networks; China leads with 356 cities

8%

of the global population had 5G mobile connections in 2021, according to GSMA

ADVANTAGE 5G

₹50

expected incremental revenue from a 5G subscriber (Arpu), according to CLSA

47%

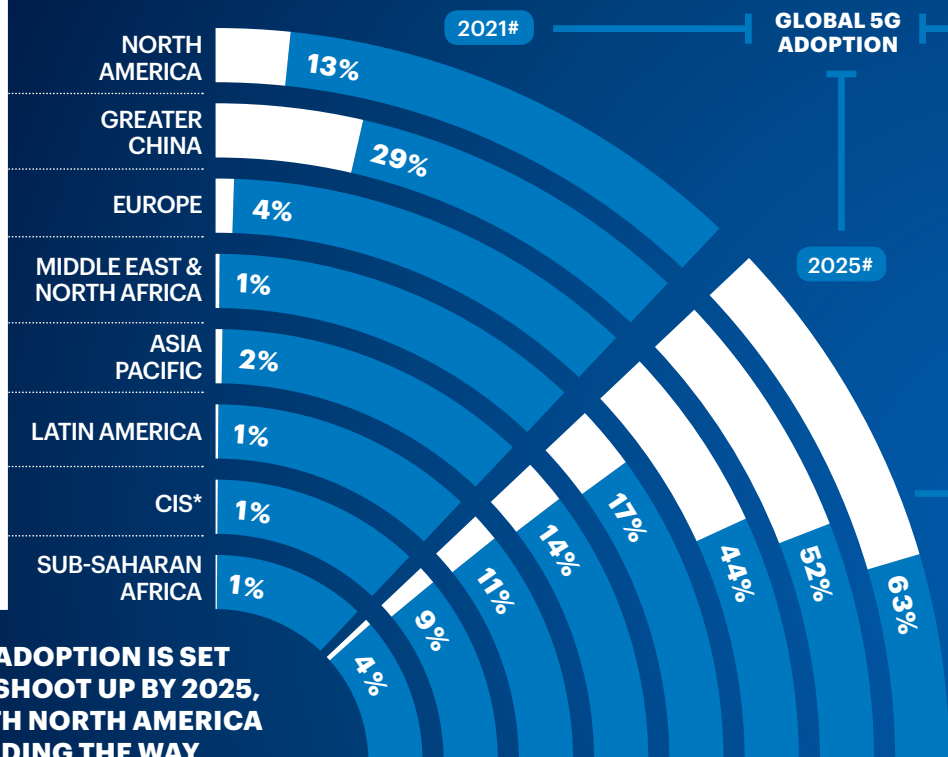

of smartphone users in India are likely to be 5G subscribers in the next 5 years, says CLSA

36%

reduction in prime 5G spectrum price recommended by the telecom regulator on a pan-India basis

| THE POINT |

THE 5G REVOLUTION

5G ADOPTION IS SET TO SHOOT UP BY 2025, WITH NORTH AMERICA LEADING THE WAY

Estimated 5G adoption as a share of total mobile connections

Even as India awaits the roll-out of 5G services, the zippy technology will contribute \$450 billion to the country's economy in the next 10-15 years, Prime Minister Narendra Modi said recently. With high speeds, superior reliability and negligible latency, 5G will catapult the mobile ecosystem into new realms. It also has the potential to transform every industry—from safer transportation to remote healthcare, and precision agriculture to seamless logistics. Here's where 5G stands in other parts of the world
