

SALIL'S INFY

THE REAPPOINTMENT of Salil Parekh as MD & CEO of Infosys for five years will be the first time anyone beyond the co-founders has assumed the top job for a second term. It comes with an 88 per cent salary hike to touch ₹80 crore. Under his leadership, the company has grown impressively and the numbers tell the story, be it on revenue, profitability or its performance on the bourses. The last quarter of FY22, however, saw pressure on margins and Parekh will now need to fix that.

CRISIS MANAGER?

Smartphone market leader Xiaomi now has a new honcho to help it tide over its current troubles. **Alvin Tse**, who is taking over as the General Manager of the company's India operations, has impressive credentials. A Xiaomi Global founding team member, Tse, a British citizen, has worked across four of the world's largest smartphone and internet markets. He replaces Manu Kumar Jain, who has moved to a global role in the company. Xiaomi India is being probed by the Enforcement Directorate and other government agencies for allegedly sending money abroad illegally.

Last Post

CO-FOUNDER JACK DORSEY'S exit from Twitter makes it the first time since the company's inception in 2006 that none of the founders are with the company. Tesla Founder Elon Musk's \$44-billion buy-out of the social media company is also hanging in limbo. Nervy times for the company.

NO TESLA FOR INDIA

While replying to a tweet, Founder **Elon Musk** stated that Tesla will not put a manufacturing plant in any location where it is not allowed first to sell and service cars. Critics in India, however, feel Musk is miffed that the government did not allow Tesla's 'Made in China' cars into the country at low import duties. Whose loss is it? Go figure.

A NEW JOURNEY

SHERYL SANDBERG'S exit from Meta—she will continue to be on its board—will mark a change in the COO's role that she defined "in her own unique way", as CEO Mark Zuckerberg had put it. Zuckerberg says it will now become a "more traditional COO role" for her successor Javier Olivan, as Meta seeks to closely integrate its product and advertisement businesses. Is Sandberg being sidelined at Meta? Zuckerberg's post seems to indicate that some cracks might have appeared.

In High Spirits

THERE WAS no surprise when United Spirits sold 32 popular brands to focus more on high-margin businesses. The interesting part is **Ravi Deol** being the buyer. His firm, Inbrev Beverages, shelled out ₹820 crore, which industry trackers think is quite low. Deol founded Barista and had also acquired Molson Coors' beer business in India last year. All eyes will be on him as he moves with his latest buyout.
