landscape. Some big-ticket projects that are proposed include an international film city, a medical devices park, and a multimodal logistics cluster.

Several initiatives are afoot towards ensuring multi-modal connectivity. Work will start on the interchange to connect Yamuna Expressway to the airport site. This is part of the 56-km Faridabad-Noida-Ghaziabad (FNG) Expressway that will also be connected to Gurugram. The UP government is looking at building a 29-km metro line to connect Jewar with the Noida Metro. Meanwhile, the Delhi Metro Rail Corp. is studying the feasibility of connecting NIA with IGIA through a 72-km-long line. Jewar is proposed as one of the stations on the planned Delhi-Varanasi bullet train project. In addition, the Yamuna Expressway Industrial Development Authority (YEIDA) is keen to have a corridor connecting the airport to the under-construction Delhi-Meerut semi-high-speed line.

CHAPTER 4 WAREHOUSING & LOGISTICS

Another key area is warehousing and logistics. NIA recently invited proposals for the development of an integrated cargo terminal and warehousing and logistics zone. “We expect cargo capacity of over 200,000 tonnes per year when the facility opens and expect it to grow up to 1.7 million tonnes by 2040,” estimates Schnellmann. NIA envisages the operation of large and wide-bodied passenger aircraft, smaller business jets, and freighters. The seamless movement of passenger traffic—including coverage of last-mile connectivity—by building a multimodal transport hub would be integral to providing long-term value. “Similarly, the integration of the cargo terminals with highly efficient and International Air Transport Association-approved warehouses and
