

systematic cohesion of truckers and freighters, rail and maritime transport would be equally significant for the growth, development and efficiency of a very challenging cargo and logistics sector,” says Link Legal’s Singh.

NIA, which is proposed to be a multimodal logistics and transport hub, is likely to transform the supply chain landscape in north India over the next five to six years. “With the emergence of the greenfield airport, the demand for land for manufacturing and warehousing sectors will surge,” says Bhupindra Singh, MD, North India, Colliers. With state support, the NIA would also address newer catchments and offer a cost advantage for shippers and cargo handlers. “The operationalisation of the airport would provide an alternative to the ever-increasing warehousing and logistics demand in the NCR. Regions such as Noida, Ghaziabad and Greater Noida may see increased development activity of modern warehouses,” says Raaja Kanwar, Chairman & MD of logistics group Apollo International.

“The Delhi-NCR will house 38 million people over the next five years. The current airport and cargo capacities are full. So, NIA will be a solid addition to the sector,” says J.B. Singh, Director at B2B logistics player MOVIN, a JV between InterGlobe Enterprises and UPS. “It will be a great asset for airlines to support express services connecting commercial centres in the north to the rest of India, and potentially serve as an international hub for South Asia.”

Apart from traditional cargo, there is the rapidly growing e-commerce segment. “This requires the service providers to continually

“Noida International Airport will help drive economic growth and job creation. The airport partners will employ 4,000-5,000 men and women from the region directly”

adapt to efficient and transparent practices, as it involves the consumer directly who is looking for speed, visibility and predictability,” says Link Legal’s Singh. E-commerce firms like Amazon and Flipkart continue to sign up large leases to cater to increasing demand. “The new airport will boost air cargo capacity in the region. Improved road connectivity between Jewar, Western UP and Haryana will make distribution into UP, Rajasthan and the rest of north India much easier and faster,” says Manju Dhawan, Co-founder, Ecom Express.

A good transport network is a prerequisite for the warehousing sector to ensure that businesses remain profitable on account of efficiencies. “NIA will act as a stepping stone to reduce overall cost and transit time and... provide seamless connectivity between various public and private modes of transport,” says Colliers’ Singh. The upcoming airport will help the region flourish as a warehousing and logistics centre like Haryana’s Bilaspur Chowk belt. “Apart from the benefits of connectivity and speed, we see a clear cost advantage for logistics real-estate developers, which would assist logistics firms like ours to lower the unit cost of delivering parcels,” says Dhawan.

CHAPTER 5 FIELDS OF GOLD

Sources in the administration say that in the past four years, the price of a *bigha* (0.619 acre) of land in Jewar has jumped from ₹7 lakh to ₹23 lakh. The results are clearly visible. In the huge courtyard of lawmaker Singh’s home-cum-office,
